

SPREADING BINS

Engineered by groundspreaders for groundspreaders

"the knowledge, the know how, the smile"

Wealleans Engineering & Mechanical specialises in the manufacture and maintenance of groundspreading equipment for both the national and export markets. Each design and manufacture is specific to the individual clients requirements. We would love to talk to you about your next build.

Features

- Three to twelve tonne capacity
- Steel/stainless or full stainless
- Low maintenance
- 700mm wide dual chain with independent control to apply one side
- Fully enclosed under floor return eliminating chassis contamination
- 700mm twin spinner - spread tested out to 30 metres
- V3 computerised control with touch screen and GPS interface with data transfer
- Coil operated hydraulic valve banks
- Twin filtration with stainless fittings

Proudly Manufactured for San Blas Groundspread - Osorno, Chile
